

Physics : Part 1 : Video 4b : Experimental Enquiry

Phil Chan

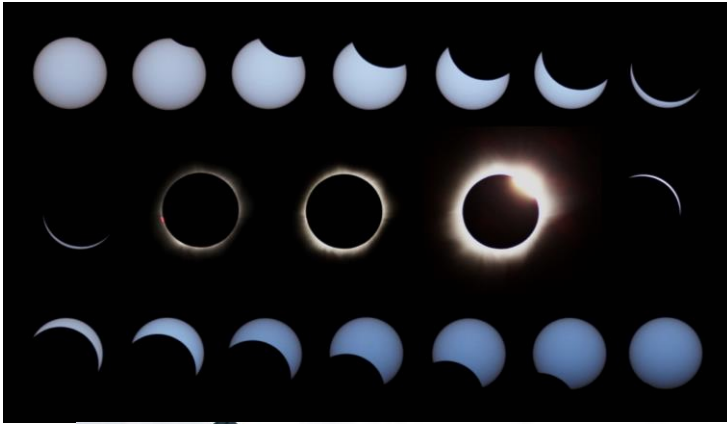

Department of Physics

Contents:

In this video, we want to highlight the magnitude of creative work undertaken by experimental physicists who are not always appreciated enough.

The video features 2 NUS astro-physics students (with other local amateur astronomers) who took 5 flights (with lots of telescopic equipment) to Luwuk (Sulawesi, Indonesia) to repeat the testing of Einstein's General Relativity Theory at the 2016 Total Solar Eclipse. Hope you enjoy this light-hearted video.

Testing General Relativity by NUS
