

CS2040S DISCUSSION GROUP

WEEK 4

ABOUT ME

- ▶ Name: Abdul Fatir Ansari (call me *Fatir*)
- ▶ 3rd year PhD Student
 - ▶ Working in the area of generative models.
- ▶ Email: abdufatir@u.nus.edu

PROBLEM

- ▶ You are given a running list of diameters of cookies.
- ▶ Whenever queried with a '#', remove the cookie with median diameter.
 - ▶ If the number of cookies **N** is odd, remove **$(N+1)/2^{\text{th}}$** cookie.
 - ▶ If **N** is even, remove **$(N/2+1)^{\text{th}}$** cookie.

KEY IDEA

- ▶ At some point, let there be **N** cookies.
- ▶ Imagine that you have two “buckets” **$B1$** and **$B2$** .
- ▶ **$B1$** stores cookies from smallest to **$N/2^{\text{th}}$** -smallest.
- ▶ **$B2$** stores cookies from **$(N/2+1)^{\text{th}}$** -smallest to largest.
- ▶ The number of cookies in **$B2$** are *more than* **$B1$** by **at most one (1)**.

ADDING A NEW COOKIE

SMALLEST TO $(N/2)^{\text{TH}}$ SMALLEST

$(N/2+1)^{\text{TH}}$ TO LARGEST

ADDING A NEW COOKIE

SMALLEST TO (N/2)TH SMALLEST

Where should I go?

(N/2+1)TH TO LARGEST

ADDING A NEW COOKIE

SMALLEST TO (N/2)TH SMALLEST

(N/2+1)TH TO LARGEST

ADDING A NEW COOKIE

SMALLEST TO $(N/2)^{\text{TH}}$ SMALLEST

$(N/2+1)^{\text{TH}}$ TO LARGEST

ADDING A NEW COOKIE

SMALLEST TO $(N/2)^{\text{TH}}$ SMALLEST

$(N/2+1)^{\text{TH}}$ TO LARGEST

ADDING A NEW COOKIE

SMALLEST TO (N/2)TH SMALLEST

Where should I go?

(N/2+1)TH TO LARGEST

ADDING A NEW COOKIE

SMALLEST TO $(N/2)^{\text{TH}}$ SMALLEST

$(N/2+1)^{\text{TH}}$ TO LARGEST

ADDING A NEW COOKIE

What can we do to solve this problem?

SMALLEST TO $(N/2)^{\text{TH}}$ SMALLEST

$(N/2+1)^{\text{TH}}$ TO LARGEST

ADDING A NEW COOKIE

SMALLEST TO (N/2)TH SMALLEST

(N/2+1)TH TO LARGEST

ADDING A NEW COOKIE

SMALLEST TO $(N/2)^{\text{TH}}$ SMALLEST

$(N/2+1)^{\text{TH}}$ TO LARGEST

COOKIE INSPECTION

$N = 12$

SMALLEST TO $(N/2)^{\text{TH}}$ SMALLEST

$(N/2+1)^{\text{TH}}$ TO LARGEST

COOKIE INSPECTION

$$N = 12$$

$$N/2 + 1 = 7$$

SMALLEST TO $(N/2)^{\text{TH}}$ SMALLEST

$(N/2+1)^{\text{TH}}$ TO LARGEST

COOKIE INSPECTION

$N = 12$

Send the 7th cookie!

SMALLEST TO $(N/2)^{\text{TH}}$ SMALLEST

$(N/2+1)^{\text{TH}}$ TO LARGEST

COOKIE INSPECTION

What can we do to solve this problem?

SMALLEST TO $(N/2)^{\text{TH}}$ SMALLEST

$(N/2+1)^{\text{TH}}$ TO LARGEST

COOKIE INSPECTION

SMALLEST TO (N/2)TH SMALLEST

(N/2+1)TH TO LARGEST

COOKIE INSPECTION

SMALLEST TO $(N/2)^{\text{TH}}$ SMALLEST

$(N/2+1)^{\text{TH}}$ TO LARGEST

WHAT ARE THESE “BUCKETS”?

SMALLEST TO $(N/2)^{\text{TH}}$ SMALLEST

$(N/2+1)^{\text{TH}}$ TO LARGEST

WHAT ARE THESE “BUCKETS”?

SMALLEST TO $(N/2)^{\text{TH}}$ SMALLEST

MAX HEAP

$(N/2+1)^{\text{TH}}$ TO LARGEST

MIN HEAP
