

Physics : Part 2 : Video 7b : Two kinds of Scientific Knowledge

Phil Chan

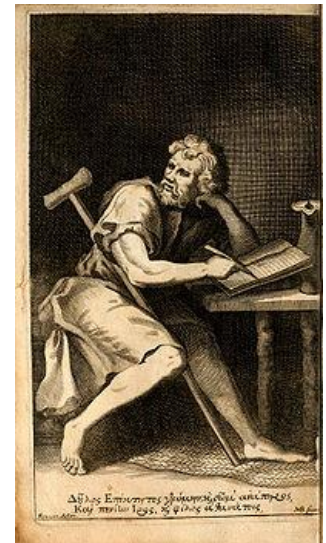

Department of Physics

Are you upset ?

... tarassei tous anthropous ou ta pragmata alla ta peri ton pragmaton dogmata ...

...what upsets people is not things themselves, but their theories about things ...

Epictetus
Greek & Stoic Philosopher
55-135 AD

Contents:

We have discussed the 2 types of Physics knowledge about nature, namely Ontological and Epistemological.

In this video, we want to highlight that micro-quantum particles are real and can be detected with an inexpensive Cloud Chamber made in the laboratory.

Again this is another experimental project done by another NUS physics undergraduate. Hope you enjoy another light-hearted video. You might as well enjoy Chemistry part in the video.

Micro Particles are Real and can be detected by a simple cloud chamber.
